

AMENDMENTS TO THE SPECIFICATION

Please insert new paragraph [0017.1] beginning on page 4, as follows:

[0017.1] Figure 5A illustrates a variant of the FSS of Figure 5, with a cut-away on an enlarged scale, wherein an antenna is encapsulated within a three dimensional volume defined by the plurality of layered surfaces;

Please insert new paragraph [0030.1] beginning on page 10, as follows:

[0030.1] Referring to Figure 5A, a self structuring – frequency selective surface 500' is formed by a stack volume of surfaces 501'a – 501'f, which operate substantially as described in regard to the device of Figure 5. The only significant difference is that an antenna 502' is partially or entirely encapsulated within the three-dimensional volume defined by surfaces 501'a – 501'f.
